

Established in 1981, Steelman Transportation has evolved into a dynamic, full-service transportation company. Whether your need is a regular shipment or a one-of-a-kind, specialized move, Steelman can find a solution to your transportation needs. Steelman Transportation operates a fleet of aluminum flatbed trailers, flatbed trailers with side kits, step deck or single drop trailers, stretch trailers, removable gooseneck trailers for roll on service, and multiple axle units for your heaviest shipments up to 140,000 pounds. Our current freight mix consists of steel coils and flat sheet; pipe and tubing; fiberglass, carbon steel and stainless steel tanks; large air conditioning modules; molded docks; manufactured equipment and machinery as well as a fleet dedicated to the hauling of hazardous materials.

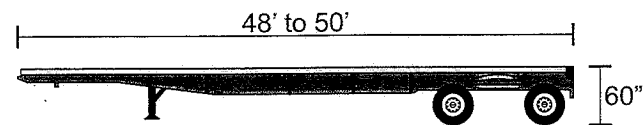

From the transportation of a partial flatbed load to the most complicated 13 axle super load, we can provide a timely, safe, efficient and competitive solution for your shipping needs. Our

logistics division expands our capabilities by adding the capacity of many partner fleets to help move your van loads, your export freight with through service to Canada and Mexico and for hauling the extremely heavy loads up to 140,000 pounds.

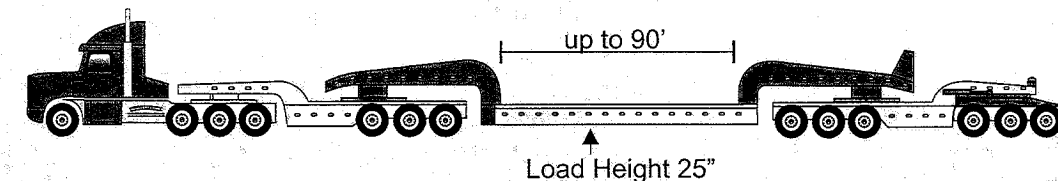

At Steelman, we have the knowledge and the personnel to handle your most complicated moves. We take pride in our over-dimensional load preparations. We utilize the latest software to compute the weight and balance on each trailer axle. We can use portable scales to ensure that we are within legal load limits. We utilize cad cam to prepare engineered drawings for specialized material handling. We have our own fabrication shop to make the needed cradles, stands and trailer modifications necessary to protect your products. We have excellent relationships with the individual state permitting offices to ensure that the over-dimensional permits to move your large products are processed accurately and timely. In a word, we are "PROFESSIONAL". Trucking is what we do full time for your benefit.
